EVIDENCE-BASED SPENDING

HOW IT WORKS

Four steps to zero excuses

01

Set Your Budget

Define monthly spending limits per category — food, transport, entertainment, bills, and more. You decide what matters.

02

Justify Before You Spend

Before logging any expense, you must provide a reason. No justification, no record. This is where NoExcuse earns its name.

03

04

Get Flagged in Real Time

At 70%, 90%, and 100% of your limit, NoExcuse sends a stern, personalized message tied directly to your own financial goals.

Review Your Report Card

Every month, get graded A–F on your financial discipline. See your weak spots and watch yourself improve.

Budget Exceeded – Entertainment

You said you wanted to save ₦500,000 by December. This purchase puts that goal at serious risk. No excuse is good enough right now.

The warning that makes you actually stop

Other apps notify you after damage is done. NoExcuse intervenes in the moment — with a message that speaks directly to YOUR goals, in YOUR words.

- ✓ Personalized messages tied to your savings targets
- ✓ Visual bars that turn red as danger approaches
- ✓ Alerts at 70%, 90%, and 100% of every category
- ✓ Evidence gate that forces conscious decisions before spending

FEATURES

Everything you need. No excuses.

Evidence Gate UNIQUE

Before any expense is logged, you must provide a reason or justification. This single feature eliminates unconscious impulse spending — something no other budget app does. You become fully aware of every financial decision you make.

Personalized Shame Messages

We don't just notify you — we remind you of your own financial goals in the moment. It's designed to sting just enough to make you reconsider.

Accountability Partner

Add a trusted friend, spouse, or parent who gets notified when you exceed a category. Social accountability is the most powerful motivator.

Monthly Report Card

Get graded A–F on your financial discipline each month. See exactly which categories are your weakness and watch yourself improve over time.

Savings Goals

Link every budget category to a bigger savings goal. When you overspend, you'll see exactly how much further away that goal just became.
